Dear Grower,

As we share our 2027 Nursery Stock Catalogue, we thank you for your continued support over the past 49 years. We look forward to meeting your plant needs in 2027 and beyond.

All our plants are grown from foundation stock, both our own and carefully selected sources under controlled conditions. All our nursery stock is inspected by professionals from the Nova Scotia Department of Agriculture and Perennia to ensure the highest quality.

We pack our strawberry plants in bundles of 26, providing a 4% overage to account for packing errors. Raspberry canes and asparagus crowns are packed in bundles of 10 or 25. Rhubarb crowns are sold individually. Our nursery stock is available from April 1 through the end of June. Please note: **No orders will be held after June 30, 2027, unless paid in full.**

NOTE: We are no longer accepting small orders. Minimum order of strawberry plants is 100 of one kind, and minimum order of raspberry canes and asparagus is 25 of all one kind.

Important Note for Strawberry Plant Pickups

If you are picking up strawberry plants from our nursery, please bring something to cover them for protection from the sun. Rapid thawing can damage the plants.

DO NOT plant frozen plants.

Satisfaction Guarantee

We guarantee satisfaction with our plants. However, liability is limited to the purchase price. We are not responsible for orders lost or damaged due to incorrect addresses or shipping delays. If you are not satisfied, contact us immediately. **All claims must be submitted by July 1, 2027.**

Visitors are always welcome at our nursery in Lakeville, Nova Scotia!

Thank you for your valued business. We appreciate your trust and support and wish you a happy, healthy, and successful 2027.

-The Keddy's

STRAWBERRY VARIETIES

***RSR* Red Stele Resistant**

EARLY SEASON

AC Wendy is a productive variety that produces medium to large, firm fruit with excellent flavor. RSR

Annapolis produces large, firm, light-red berries that are ideal for the fresh market. RSR

Sable offers bright, attractive berries with good flavor. RSR

Galletta produces large berries that freeze well, with vigorous plant growth. RSR

MID EARLY SEASON

Brunswick is noted for its uniform berry shape and color. RSR

Archer is a cold-tolerant variety that produces very large, very sweet berries with a uniform conic shape.

Honeoye is known for its superior yield and attractive appearance, making it an excellent shipping berry.

MID SEASON

AAC Audrey produces large, firm, sweet, and very tasty berries, though its foliage is moderately susceptible to powdery mildew, similar to Mira.

AAC Evelyn produces very large, firm berries that offer good flavor and an appealing glossy appearance.

AAC Kate produces large to very large berries that are firm yet juicy, and the plants show moderate resistance to powdery mildew.

AAC Lila produces large, conical, firm, medium-red berries with good flavor and some resistance to red stele. *(This variety is not available for sale in Quebec.)*

Flavorfest produces large berries with excellent flavor and has a longer growing season than most commercial varieties. RSR

Cavendish produces large, firm fruit with excellent yields. RSR

Laurel (K93-20) produces medium-large, medium-red berries with excellent flavor and average yields and shows good resistance to both red stele and black root rot.

Dickens is a high-yielding variety producing firm yet flavorful berries, well suited to cold-winter climates and tolerant of root rot.

Kent is a vigorous, high-yielding variety producing berries that excel in both size and appearance.

Keepsake produces medium to large, firm fruit with attractive color and excellent flavor.

MID LATE SEASON

Mira produces firm, bright berries with heavy harvest potential. RSR

Jewel produces large, high-quality berries with excellent flavor and vigorous plant growth.

LATE SEASON

Cabot is known for producing very large, bright red, juicy berries with soft skin but firm flesh. RSR

AC Valley Sunset produces large, sweet berries and continues to bear fruit when most other varieties have finished for the season.

VERY LATE SEASON

Malwina is a high-quality variety producing large, glossy, dark-red berries with excellent flavor; the berries hold their size well through the season, the plants show resistance to mildew, and it ripens later than AC Valley Sunset.

EVERBEARING VARIETIES

Seascape - Good producer of large, good flavor berries. Starts producing in early to mid August until fall frosts. Very early production the 2nd year.

Albion - Berries are large bright red color, firm and good flavor. Starts producing mid to late August until freeze up.

ROYALTY FEES

Royalty fees now apply to most new varieties. These fees go to help support various breeding programs. These fees must be added to the cost of the plants.

AC Valley Sunset- \$12.00 per thousand.

AAC Audrey - \$15.00 per thousand.

AAC Lila - \$15.00 per thousand.

Archer, Dickens, Galletta & Keepsake - 15% of plant cost.

AAC Evelyn, AAC Kate - \$17.00 per thousand.

Malwina- \$50.00 per thousand. (*No sales into USA*)

To Our Fellow Nova Scotia Growers

As in past years, your 2027 plant dues can be paid with your plant purchase. These dues will be sent to Horticulture Nova Scotia and credited to your 2027 membership. Working together for a stronger industry is to everyone's benefit. Contact Horticulture Nova Scotia at 902-678-9335 for more information.

A DOLLAR FOR RESEARCH

As in other years, our nursery will be sending \$1.00 for every 1000 plants sold to the North American Strawberry Research Foundation. Most strawberry nurseries in Canada and the U.S. participate in this program to support strawberry research in North America. Several research projects in Nova Scotia have received funds from the foundation.

RASPBERRY VARIETIES

Prelude is an early variety producing round, red, medium-sized berries of excellent quality and good flavor, and the plants feature winter-hardy, vigorous canes.

Boyne is an early mid-season variety with medium to tall canes that are productive and very winter hardy, producing medium-sized firm berries with good flavor.

Killarney is a mid-early variety that produces deep red, firm, sweet berries of excellent quality and is known for its exceptional cold hardiness.

AAC Eden is an early to mid-season variety with spineless canes and firm, large, conical fruit of excellent flavor. (***This variety is not available for sale in Quebec***)

Nova is a mid-season variety with tall, nearly spineless, high-yielding plants that tend to flower in the fall and produce medium-large, bright red, firm fruit; the variety is also winter hardy.

K81-6 is a mid-late season variety with medium to tall canes that have a few spines near the base; it produces very large, medium-red fruit of medium firmness and shows good hardiness.

Encore is a late season, winter-hardy variety that produces large berries with good flavor.

Royalty is a late variety with large, vigorous canes that produce medium-firm, large berries; the sweet fruit can be harvested either red or purple and is less tart than other varieties.

Fall-Bearing (Primocane)

Heritage is an everbearing variety that produces fruit in mid-summer and again in September or October; the plants are winter hardy and upright, and they produce medium, firm, flavorful red berries.

Anne is a fall-bearing yellow raspberry variety known for its mild, sweet flavor.

ROYALTY FEES

Prelude, Encore, Anne- 15% of plant cost.

AAC Eden – 20 % of plant cost. (***No sales to Quebec***)

RHUBARB

Canada Red – Brightly coloured large red stalks with light red center.

ASPARAGUS

Guelph Millennium – This male variety is known for its cold tolerance, its productivity, and the solid green colour of its tasty spears.
